The auction companies listed below produce auction software that is BidFind compatible. Each company has created special pages for our agent and has sold auction software to sites that BidFind is indexing. Please contact the companies directly for more information.

Auction Broker v3.6

<http://www.auctionbroker.com>

sales@auctionbroker.com

Auction Broker Software, Inc. has been developing and running real-time auction solutions since late 1995. Their staff consists of the most experienced programmers in the industry, as well as a licensed auctioneer to make sure all your needs are met.

If you plan to run auctions on the Internet, you need to review [The Auction Broker!](#)

The Auction Broker allows you to create and design your own customized auction. It's not just an auction, it's a fully functional user friendly auction tool with an e-commerce solution. It's designed to be simple to navigate yet fast and powerful.

The Auction Broker offers maximum flexibility, for any size business. An easy to use back end administrator (Auction Control Center) is jam-packed with powerful features to customize their software to your needs.

The Auction Broker is available for rent or purchase. You can run your licensed copy of The Auction Broker on your server. Or use one of their Super Powered servers, specifically designed to handle the heavy load of a real-time auction. The software includes a FREE training course, and a FREE 30-day unlimited technical support package.

Let them arrange a tour of The Auction Broker by contacting them at <http://www.auctionbroker.com/contact.htm>

Or visit their site for more details at <http://www.auctionbroker.com>. Follow the links to actual auctions run by satisfied Auction Broker Customers!

If you're looking for an auction with a proven track record, visit The Auction Broker today!

Auction Server 2.5

<http://www.beyondsolutions.com>

info@beyondsolutions.com

BSI Auction Server is a comprehensive auction software package which also includes an entire Website! Inspired by large and professional auctions, the software has built in all of the features and functionality you would expect in order to conduct a state-of-the-art online auction business.

Auction Server 2.5 is completely customizable. Not only do you get all of the standard features you would expect and more, but you also have the ability to modify the backend source code itself. The software also includes the entire frontend of your auction site including all text and legal disclaimers as well as placeholders for your graphics. All you need to do is plug in your own logos and

images and you're ready to go!

If you need more help, they also do custom programming and design work so they can truly provide a complete turnkey solution to your auction business needs. Check out their Website

AuctionShare

<http://www.auctionshare.com>

sales@auctionshare.com

 There are thousands of internet auction sites online and the list is growing every day. Most of them will fail or at least never make a reasonable profit. Why?

First of all, these auctions have very few items up for bid. Buyers will visit, look at a few categories, see nothing is there, and then leave...never to return. Second, because the traffic to these sites is so low, sellers don't want to place their items up for bid. Why would they when they can list their items at one of the major auction sites and have hundreds of customers view and bid on them?

It's a never ending struggle...no items, no customers...no customers, no items. That's where AuctionShare can help!

With AuctionShare you not only get Auction Software, you get an entire Auction Solution. Other companies provide you with software that you must configure yourself or pay to have it done. AuctionShare's talented Microsoft Certified Staff will provide you with the highest quality, full featured Auction Software available, set it up for you, fill it with current auctions, supply you with customers, and market your auction site, all at a fraction of the cost others would charge you for software alone.

Not to mention AuctionShare provides you with unlimited FREE upgrades, unparalleled FREE technical support, inexpensive full site hosting, and many other auction specific services

Auctioneer v3.0

<http://www.auctioneer32.com>

info@vtrader.com

The latest version of this feature rich package is now available from Virtual Trader. Auctioneer offers you the power and speed of ODBC compliant relational database systems, the flexibility of customization and the ease-of-use you need. Scalable from individual to corporate use, Auctioneer offers unlimited categories, items and users, as well as a host of other features such as integrated billing, credit-card authorization compatibility, searches, chat, reports, user services, customized listing fee and commission profiles for individual users, and more! Administration is browser-based, so you can configure and maintain your site from anywhere.

Auctioneer's flexibility also allows you to customize the software to have the "look and feel" you want, as well as operate within the parameters you define.

Bidder Network

<http://www.bidder-network.com/html/software.htm>

software@bidder-network.com

The Bidder Network solution for creating auction sites is available for single or multiple sellers. Various packages are available that include, auctions, online stores, and catalog sales.

These packages were designed with time saving features in mind. Complete online auction creation and administration. Also supports upload of auctions created in database software such as Microsoft Access, etc. Auction sites may also be integrated with their online store software, making the transfer of product from store to auction and back a snap.

The front end offers potential bidders easy navigation, powerful searches, and the ability to track all of their bids from one location. Buyer Ratings, featured auctions, and easily customizable HTML through the use of templates and sitewide color variables.

All bidding, email, and tracking is automatic, so the auctioneer need only create, promote, and ship their products.

Methods of Purchase: Hosted Sites, Off Site License, Reseller License, Monthly Lease

Emaze Auction

<http://www.emaze.com/auction.cfm>

steve@emaze.com

818-548-1466

Emaze Auction is a powerful system for running auctions on your own site. It is completely web-based, easily expandable, and fully customizable! Emaze Auction makes it incredibly easy to set up an auction site with anything from minimal functionality to the most advanced functionality offered on the big auction sites and previously available only in auction products costing tens of thousands of dollars.

Features include: Automated emails. Auto-bidding. Reserve prices. Full support for sellers posting their own items. Lots may remain open past their closing time while bidding is still active. Private lots. Create your own categories. Customize how lots are displayed. Support for credit cards.

Emaze Auction is written in Cold Fusion and the full source code is available to customers. They can also customize Emaze Auction to add any features you want. For more information, please check out their website at <http://www.emaze.com>.

EveryAuction<http://www.everysoft.com>sysop@cyberservices.com

EveryAuction is a FREEWARE CGI auction program written entirely in Perl. It features unlimited categories and items, automatic e-mail notifications, user verification and registration, open and closed auction tracking, an intuitive user interface, easy user posting, an integrated search engine, and much more.

Because EveryAuction consists of a single Perl script, it takes under two minutes to configure and install on most systems. It will run on any platform that supports Perl and has been tested on UNIX, NT, and Macintosh systems. No administrator interaction is required during normal operation once the script is up and running.

EveryAuction is easy to customize and documentation is included to make setup a breeze. Support is also available free of charge via online forums.

Customization, technical support, and installation are also available via EverySoft.

Telegraph New Technologies<http://www.telegraph.net>solutions@telegraph.net

1.800.300.7179

Telegraph New Technologies software supports different types of auctions including multiple winners, and single winner auctions. The software has an extensive administrative area. The software allows online browser management of auctions and bids. This increases customer satisfaction and fewer chargebacks. Real time credit card authorization is supported by this program.

The auction software is written in Cold Fusion which is very customizable for particular auction needs. Static page publishing uses database resources efficiently. Permanent HTML records of previous live auctions are archived.

FAQ

Answers to some
of your questions[Contact](#)How to get in
touch with the
BidFind crew**What does BidFind do?**

BidFind collects auction item information from popular online auction sites and indexes that data to make it quickly searchable.

When did BidFind start its service on the Internet?

We first began our service in December of 1995. BidFind was the first auction search engine on the Internet and currently we are the largest auction data aggregator.

How many auction sites are on the search list?

Currently there are over 325 popular auction sites and we will be adding more. Please view the [Auction Sites](#) page for a listing.

I have an item on auction but cannot find it when searching.

There are many reasons why an item may not appear. (1)First ensure that the auction site is one that is on our list. (2)We do our best to read the listings on auction pages but sometimes the HTML format of a page may *trick* our agent, hence the item will not get indexed. (3)It may have been posted just after we visited the auction site and may not show up until we revisit the site.

Is there anything I can do to ensure that my item shows up on the list?

Yes and no. We cannot guarantee that your item will be indexed (this is dependent on the auction page where you have listed your item). However, if it does get indexed, then it's a matter of getting a match when someone performs a search. We recommend using good keywords in the "TITLE" of your item when you post.

Example:

Not so good title - "Pent P66 with 16 meg"

A better title - "Intel Pentium P5-166 CPU 512 cache with 16 meg EDO memory and cooling fan"

How often is the list updated?

It depends on the day of the week, usually 2 times per day.

I do not wish to purchase software but would rather have my auction site hosted, can you help?

Please visit our [Auction Hosting](#) page for more information.

I am looking to purchase auction software, can you help?

Please visit our [Auction Software](#) page for a list of vendors that provide BidFind compatible auction software.

Can BidFind collect data across the Internet?

BidFind provides agent technology services for data collection. Some of BidFind's current clients include Fortune 500 companies.

Can I place your logo on my homepage?

Absolutely! We would be delighted to have a link from your homepage. You may want to take a look at placing an "INPUT" field also, please see the [Add the Power](#) page for the HTML code and a few logo samples.

Where can I get my auction site registered with BidFind?

Please visit our [Getting Listed](#) page for more information.

Does BidFind offer a co-branded service or an affiliation?

Yes, please visit our [Search Affiliation](#) page for more information.

Where can I get some advertising info?

Please visit our [Advertising Page](#).

Introduction

Auctions are very popular on the Internet. Refurbished and discontinued computer equipment constitutes the largest segment of items up for sale. However, you can find almost anything up for auction.

Before you buy, do your homework - you don't want to overpay. Visit a couple of stores that sell the item and check their price. Remember to deduct a fairly substantial percentage from the cost of the new merchandise if the item is refurbished. Numerous times we have seen someone make a bid exceeding the lowest price available at an online merchant.

Bid early. Most auctions, assign priority based on the first time you place a bid for a particular item. If someone else bids more, you just need to match their price and your higher priority will prevail.

Agents can help you search dozens of online auctions to help you find a particular product.

There are also a growing number of auction houses, which host auctions for individuals. We have a list of the biggest ones here.

[Disclaimers & Legal Information](#)

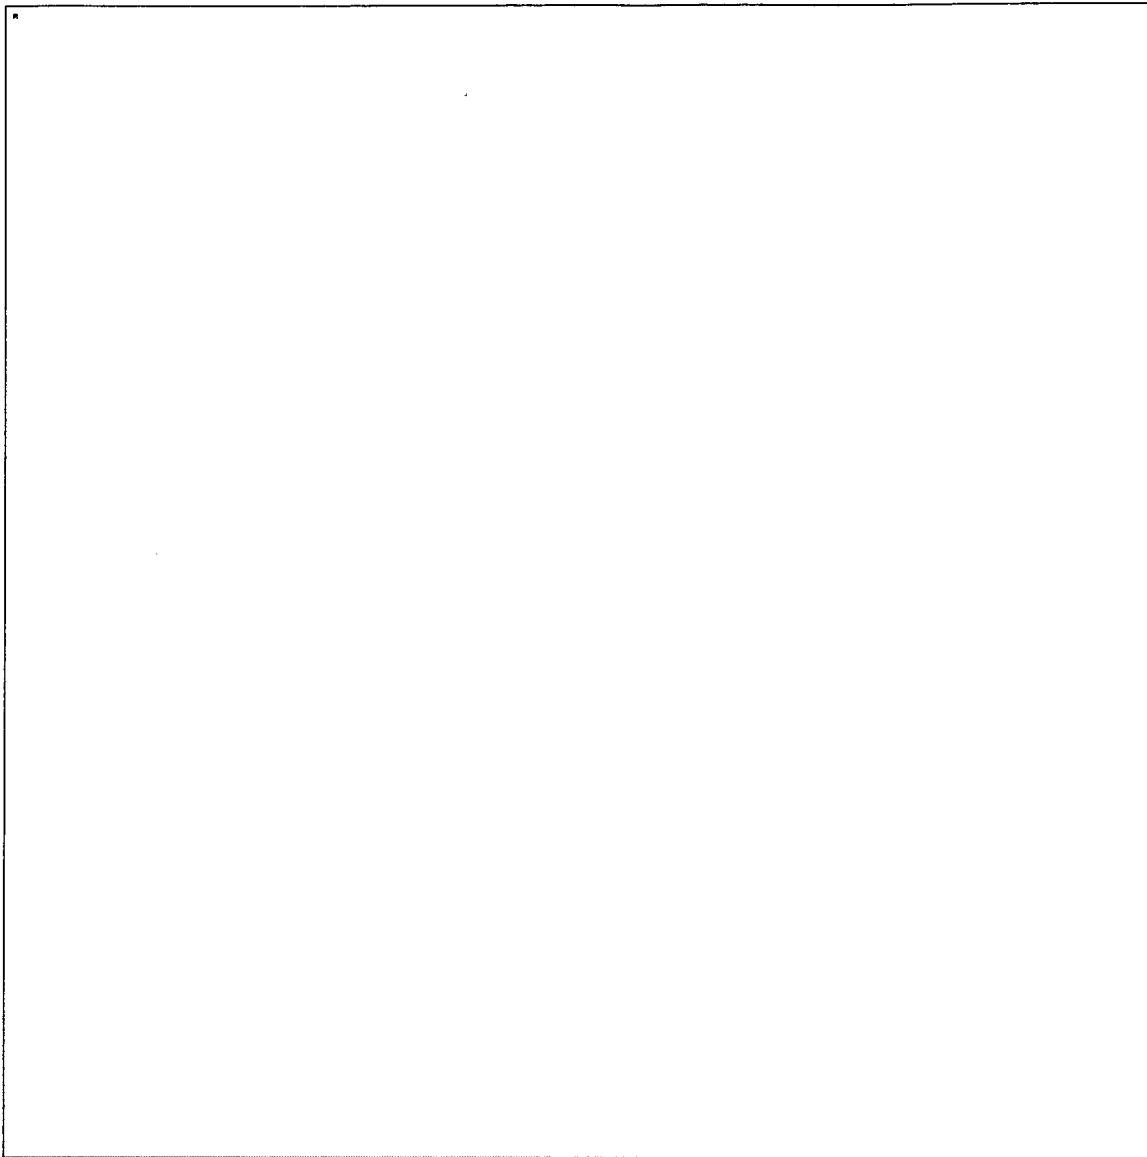

MCI offers 9¢ per minute rate

MCI has announced a 9¢ per minute rate except for 5¢ per minute rate on Sundays. The catch is that billing must be by credit card and billing and customer service is via the web. There is a \$5 per month minimum and a "National service fee" above usage of \$1.07 per account. (A similar offer is available by a smaller carrier through AOL, but AOL membership is required.) See our [MCI page](#).

Helps You Save on Long Distance

Q: Can I really cut my phone bill?

A: Yes. While most companies today provide excellent sound quality, there are enormous price differences. Rates vary widely, even within the same company. Rates for the same monthly phone calls can vary by over 50%. AT&T's base rate for a residential business day call is .28 cents per minute (Eff. 11/8/97). They offer plans which have rates at .15 cents and .10 cents per minute. The potential savings are enormous.

Q: What tools are available to help me save?

A: There are two tools available through this site.

The first is access to rate, service and plan information available through this WWW site. You can access a summary of key rates from the largest long distance providers. (Many

of our rates may be more current than the rates listed in their own pages.) You analyze your calling patterns, apply the rates, and determine which of the companies and plans are best for you. Check back often as the rates and plans change.

The second is a service which does your homework for you. You send in a recent long distance bill and we analyze it. We calculate your costs using at least a dozen different companies and at least two dozen different calling plans. Then we send you our analysis including a calculation of what your calling would have cost with the best plans for you. This costs you \$29.99 and we do not even cash your check unless you would save at least ten dollars per month. [More about Fone Saver services.](#)

[Home](#)
[Domestic Rates](#)
[International Rates](#)
[Tips](#)
[Consumer Information](#)
[FAQ](#)
[LD Carriers](#)
[Save Me The Money](#)

Q: Who can use these tools?

A: Residents of the United States mainland who make at least some long distance calls in the U.S.

Q: Why is picking the right plan difficult?

Please visit our advertisers.

A: There are literally hundreds of plans available for residential phone use. No single plan is best for everyone. Most companies have multiple plans depending on when you signed up, your calling pattern, and how they marketed you. Fone Saver keeps a database with dozens of the best plans available to consumers. The major domestic and international rates and plans from the biggest companies are listed on this site. Because of room (and because we can't give all of our services away), other plans are not listed. A few more companies can be found in our Long Distance Carrier phone listing.

Q: What should I know about these Web pages?

A: The data contained in our Web pages are believed to be correct at the time they were last updated, but they may be wrong and are subject to change. *You should check with the carrier and confirm the information herein before changing any service.* The service marks listed belong to their respective companies. For space reasons we list only the six largest carriers who offer residential programs. The six largest are determined by FCC statistics.

Q: What else do I need to know about shopping for long distance?

A: Lots. Check out our [tip sheet](#).

Q: Who is Fone Saver?

A: Fone Saver, LLC is dedicated to helping you the consumer meet your long distance needs and save on your long distance bills. We are a non-biased collector and analyzer of long distance information. Other companies provide this information to businesses, but we are the only company offering these services for residential users.

This site is optimized to work well with many browsers. If yours is not one of them, please drop us a line at: f_save@snet.net Please let us know what the problem is and the browser you are using. Thank you.
